REASONS FOR ALLOWANCE

1. The following is an examiner's statement of reasons for allowance: The claims are allowable for at least the following reason. The claims detail steps of the selected server: downloading a class definition after receiving the task request, wherein the class definition maps locations of information in the task request and allows the selected server to process the task request, such that the parameters and data are extracted from the task request and a generic compute technique is invoked which is capable of execution a plurality of types of tasks using the extracted parameters and data. The cited prior art of record, in particular U.S. Patents 6,463,480 and 5,423,042, at best details receiving a request from a client at a server wherein (1) the server is capable of executing a plurality of types of requests and previously stored registered information is retrieved to direct the server when, if, and how often to run the function code of the request or how to program an entity that is to execute the function code of the request. The cited prior art of record does not mention or teach that the previously stored information maps locations of information in the request. Therefore, the claims are allowable over the cited prior art of record.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
